

Gemini™

Features and Benefits

- Versatility**
 - 21 FDA cleared applications
 - 42 Spot Sizes allow ultimate versatility
 - Adjustable power, pulse width and pulse duration settings
 - Light, ergonomically designed handpieces:
 - 10mm VersaStat™ for quick treatment of larger areas
 - 1 - 5mm continuously adjustable VersaStat i™ for precision treatments
- Safety**
 - Nd:YAG treatments are effective for most individuals, including those with darker or tanned skin
 - CoolSpot™ technology for continuous contact cooling
 - Photon recycling technology enables better results with lower power settings
- Simple to use and easy to learn**
 - Intuitive user interface
 - Computer assisted fluence adjustments

Lyra i™

Features and Benefits

- Versatility**
 - 11 FDA cleared applications
 - Adjustable power, pulse width and pulse duration settings
 - Light, ergonomically designed handpieces:
 - 10mm VersaStat™ for quick treatment of larger areas
 - 1 - 5mm continuously adjustable VersaStat i™ for precision treatments
- Safety**
 - Treatments are effective for most individuals, including those with darker or tanned skin
 - CoolSpot™ technology for continuous contact cooling
 - Photon recycling technology enables better results with lower power settings
- Portable for quick and easy movement of the laser**
- Simple to use and easy to learn**
 - Intuitive user interface
 - Computer assisted fluence adjustments

Aura i™ with StarPulse™

Features and Benefits

- Versatility**
 - 14 FDA cleared applications
 - Adjustable power, pulse width and pulse duration settings
 - Light, ergonomically designed handpiece:
 - 1 - 5mm continuously adjustable VersaStat i™ for precision treatments
 - Range of accessories meet various treatment needs
 - Optional DermaStat™ allows pinpoint accuracy and treatment without cooling.
- Safety**
 - CoolSpot™ technology for continuous contact cooling
- Portable for quick and easy movement of the laser**
 - Uses standard 115V electrical service
- Simple to use and easy to learn**
 - Intuitive user interface
 - Computer assisted fluence adjustments

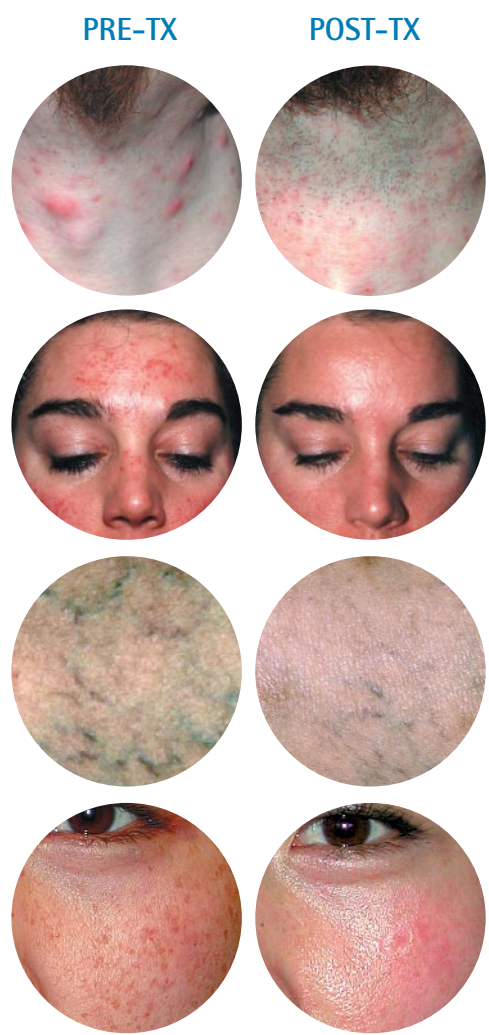

Venus i™

Features and Benefits

- Versatility**
 - 2 FDA cleared applications
 - Variable fluence adjustments allow deliberate choices on ablation depth and recovery time
 - Adjustable power, pulse width and pulse duration settings
 - Ergonomically designed handpiece
 - Range of accessories meet various treatment needs
- Safety**
 - Flat beam profile eliminates pin-point bleeding and creates uniform tissue treatment
- Portable for quick and easy movement of the laser**
 - Uses standard 115V electrical service
- Simple to use and easy to learn**
 - Intuitive user interface
 - Computer assisted fluence adjustments

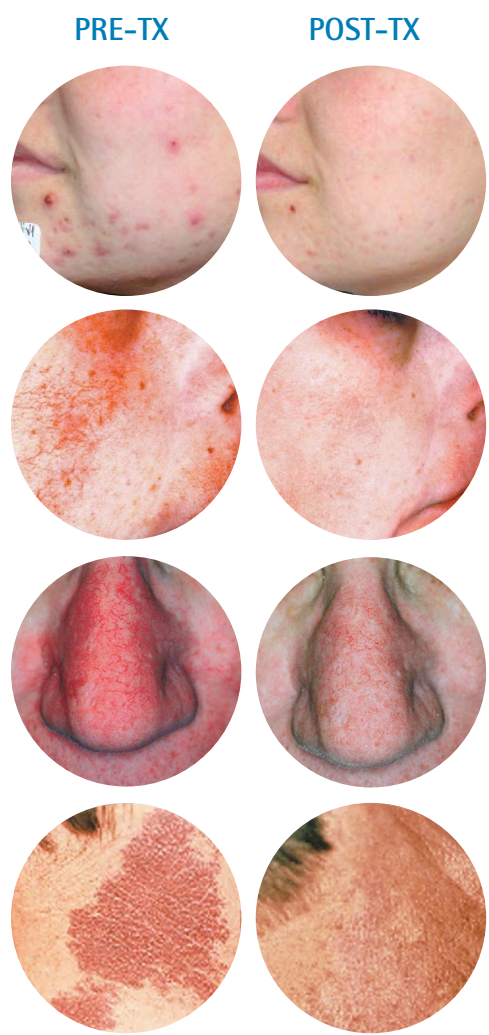

- FDA Cleared Applications**
- Acne Vulgaris***
- Collagen Stimulation**
- Wrinkles*
- Vascular Lesions**
- Red Facial Veins
 - Blue Facial Veins
 - Red Leg Veins
 - Blue Leg Veins
 - Matted Telangiectasia
 - Rosacea
 - Hemangiomas
 - Cherry Angiomas
 - Spider Angiomas
 - Red Port Wine Stains
 - Blue Port Wine Stains
 - Purple Port Wine Stains
 - Venous Lake
- Pigmented Lesions**
- Solar Lentigines
 - Café-au-lait Stains
 - Melasma
 - Post Trauma Hyperpigmentation
- Hair Removal**
- Pseudofolliculitis (Shaving Bumps)
 - Permanent Hair Reduction*

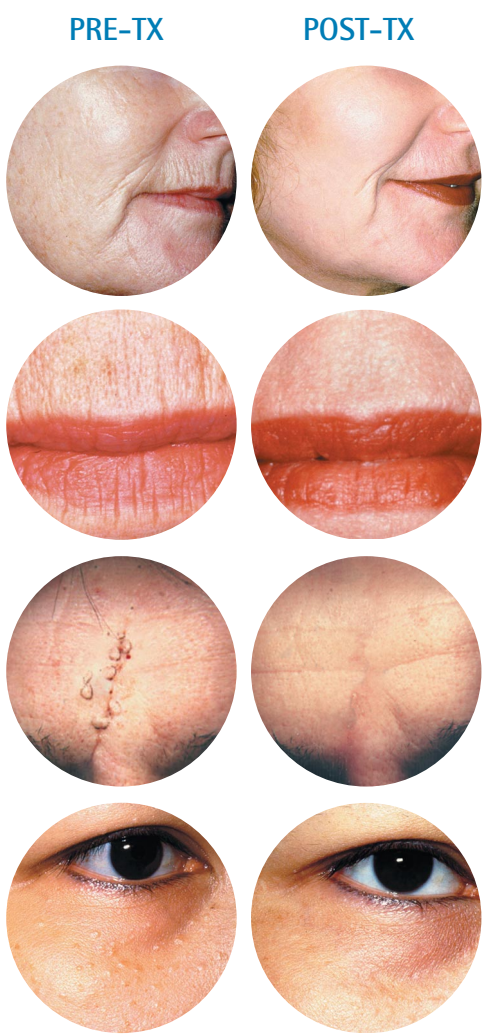

- FDA Cleared Applications**
- Collagen Stimulation**
- Wrinkles
- Vascular Lesions**
- Red Facial Veins

Laserscope McKesson Medical-Surgical American Express

Partners Committed To Helping Build Your Aesthetic Practice

For over 20 years Laserscope has designed and manufactured a diverse line of advanced laser systems and is a leader in surgical and aesthetic technology. Partnering with McKesson Medical-Surgical, the nation's largest distributor of healthcare products and American Express Business Finance, a household name in fast, convenient, fair financing, Laserscope affords you a breadth and depth of service unmatched in the laser industry.

Advantages of Acquiring Laserscope's Aesthetic Systems

Versatility

Each system can be used for a range of today's most common cosmetic procedures, allowing you to address the needs of a diverse patient population.

Safety and Durability

Thoughtful design and extensive lab, clinical and field-testing ensures safe, predictable and reproducible outcomes.

Ease of Use

Through extensive usability and field-testing, each system has been refined to a point that it is extraordinarily easy to learn and simple to use.

Solid Clinical Outcomes

The successful use of each system has been extensively researched and documented through the collection of long-term clinical data¹.

Ongoing Updates

As the owner of a Laserscope system, you will have access to up to date clinical data, treatment parameters, guidelines and forms on our on-line Customer Portal.

Clinical Training

With each purchase, Laserscope sends a clinical specialist to your practice to train both you and your staff on the use of your laser systems including technology, safety, treatment parameters and clinical endpoints.

Marketing Support

Each system is shipped with a marketing kit that is complete with general information, tips and tools that will help you get your new aesthetic practice off the ground.

Service and Warranty Support

With a highly trained team of field engineers, a responsive customer support center, quality parts, an array of service programs and the industry's only 99% up-time guarantee (U.S. only), you will have a system you can count on.

Joining the laser system's versatility, safety, reliability, ease of use and clinical superiority with the backing of a world class training and support team, Laserscope and its partners help you establish yourself as a premier aesthetic laser treatment provider.

Rewards for Becoming an Aesthetic Laser Treatment Provider

- Achieve profitability with only a few patients each week
- Avoid the issues of insurance, billing and managed care
- Enjoy peace of mind knowing you have a stable income
- Have more time for current patients, family or hobbies
